

Figure 1 consists of two schematic diagrams, (B) and (C), illustrating the experimental setup. Diagram (B) shows a single subject sitting at a table, looking at a screen. A camera is positioned above the screen. Diagram (C) shows two subjects sitting at a table, looking at a screen. A camera is positioned above the screen. Both diagrams show the subjects' heads and the screen, with the camera capturing the interaction.

The diagram shows a four-part system with a common busbar and a common load. The busbar is represented by a horizontal line with four segments, each containing a circle with a dot. The load is represented by a horizontal line with four segments, each containing a circle with a dot. The busbar and load are connected by a vertical line with a switch symbol (a circle with an 'X'). The load is also connected to a common ground symbol (a circle with a cross) and a common load symbol (a rectangle with a diagonal line). The diagram is labeled with a circled 'E' at the bottom.
